

5mm Wool Design Felt

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

Available for furniture, fashion, and vertical surface applications, this felt product is a high-quality wool material. It contains no formaldehyde, and is 100% VOC free. Filzfelt's wool holds the Oeko-Text Standard 100 certification.

Sheep's wool contains lanolin, a thin waxy coating on the fibers which makes it naturally water and soil resistant. Plus, because wool retains moisture in every fiber, it resists flame without chemical treatment. It can also be 100% biodegradable as it is a natural fiber.

This product can be customized with a flame retardant treatment. We advise selecting **untreated textiles** whenever possible.

*Ask about budget-friendly "off-cuts".
