

Multi Layer Flooring

A HEALTHIER AFFORDABLE
BUILDING PRODUCT

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

LOW-EMBODIED CARBON
MATERIAL

Kährs's 3-layer engineered hardwood flooring is made up of a surface layer, a core layer, and a backing. Surface treatments are free from solvents, formaldehyde and isocyanate. Engineered hardwood allows a floating installation on a level surface. This allows you to avoid potentially harmful adhesives and enables future disassembly and reuse.

The AWARE collection is bio-based, PVC-free, and can be sanded/refinished to allow for a longer lifespan.

*NOTE: This product is ULEF as opposed to NAF, meaning it contains ultra-low emitting formaldehyde. The products carry FloorScore emissions certification.

Per Kährs's EPD, this product meets HML's criteria for low embodied carbon.

CATEGORY

Wood Flooring, Engineered Wood

MANUFACTURER

Kährs

MATERIAL COMPOSITION*

Wood/Wood Fiber 93-94% [Amino Based Glue 2.6-3%, Carbamide Adhesive 1.0-2%, Lacquer Sherwin-Williams 0.8-1%, Filler 0.1%, Polyvinyl Acetate (PVA) 0.08-0.1%], Polyolefin Foam Plastic 0.4-0.5%, Polyester Foam - Bottom 0.5-0.5%

*as reported by the manufacturer
