

Ecologic Trademark LimeWash Platinum

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Ecologic™ LimeWash Platinum is a mineral coating which bonds as crystals form in the pores of the substrate. It is breathable and due to substrate and mineral joined together, water or salts cannot cause the surface to bubble or flake.

LimeWorks.us are serious experts through their profound experience in masonry, historic restoration and working with Lime - Naturally Hydrated Lime (NHL). Due to substantially less energy usage during production with NHL, the release of CO2 into the atmosphere is reduced considerably. Furthermore, Natural Hydraulic Lime (NHL) reabsorbs most of the CO2 during the curing process, while cement reabsorbs none.

CATEGORY	MANUFACTURER
Paint / Mineral, Lime	LimeWorks.us

MATERIAL COMPOSITION*

High Calcium Hydrated Lime (>90%), Skimmed Milk Derivative (<1%), Borax (<2%), Alum (Aluminum Sulfate) (>5%), Bluing Agent(>0.005%)

**as reported by the manufacturer*
