

Modelling Beeswax

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Stockmar’s Modelling Beeswax is a nondrying wax that warms in your hand to create a reusable molding material. The product carries an AP Seal. It was developed for use in early childhood education, and was designed to be non-toxic and safe for this sensitive audience. In addition to meeting the toxicology standards of the AP Seal, Stockmar commissions an independent residual analysis laboratory to test every batch of ingredients that they use in their products.
