Purified Boiled Linseed Oil

AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Linseed Oil is a natural, solvent-free finish coating derived from flax seeds. Not only does it perform better than petrochemical alternatives - it is also much healthier. Linseed oil is free of toxics such as isocyanates and bisphenols, which are found in polyurethane and epoxy resins. Allback manufactures their Purified Linseed Oil in Sweden. Their Purified Boiled Linseed oil is a drying oil, making it ideal for a final finish on wood and metal.
