

Wheat Paste

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Wheatpaste is a natural, non-toxic adhesive. It has been in use for centuries and is commonly used to put up posters, make paper-mâché and collage, and for archival quality bookbinding. Playbox’s product is made from real wheat and is free of preservatives. It is sold in powder form and can be activated by adding water. Alternatively, wheat paste can be easily and inexpensively made at home. There are many DIY recipes, including [this one](#), online. The gluten in wheat flour lends a permanent bond to wheat paste. Changing the ingredients will alter the permanence of the adhesive.

CATEGORY

Adhesive / Model Making, Wheat

MANUFACTURER

Playbox

MATERIAL COMPOSITION*

Starch <70%, Crystalline Silica <0.5%

**as reported by the manufacturer*

AVAILABLE SIZING

Available in 1 lb. and 3 lb. buckets
